

Control Systems RCP Control Panels

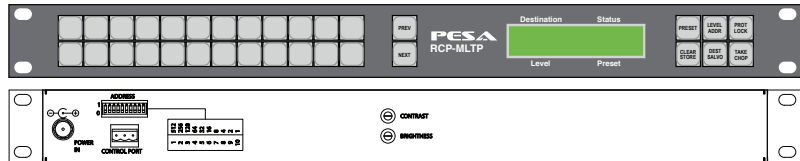

RCP Control Panels RCP-MLTP

PESA's popular MLTP panel offers a very cost effective solution for full matrix control, multi-level switching and direct "TAKE" capability. It includes 24 programmable pushbuttons with Next and Previous keys for selection of source and destination data.

Easy to read LCD display provides backlit status of all functions within the panel.

Pushbuttons are relegendable with LED backlighting in each for ease of reading in low light situations.

- RCPMLTP: Control panel and power supply for 90-240VAC

FEATURES

- 1RU
- LCD display for Destination, Status, Preset and Level
- 24 relegendable data keys
- Next and previous keys for data selection
- Data keys configurable as Source, Destination, Category, Index or Level
- Select multiple levels and sources simultaneously for a specific destination
- Source keys can "TAKE" directly to active destination
- Power adapter for US, UK, or Euro style plugs

RCP Control Panels RCP-MLTP2

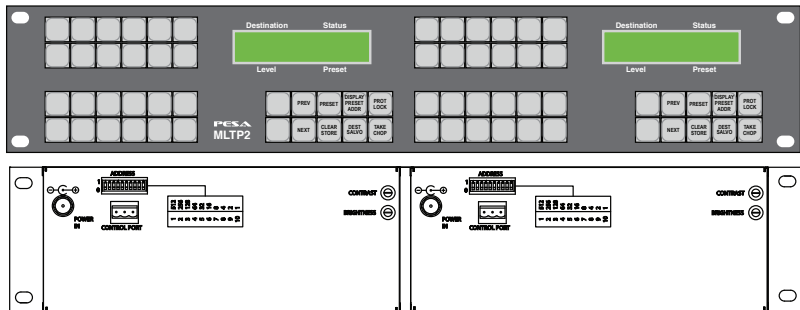

PESA's unique MLTP2 remote control panel offers full matrix control, multi-level switching and direct "TAKE" capability in a variety of styles and mounting options.

The basic MLTP2 is a 2RU, half-rack width console mount panel with rack style mounting ears, as shown below - left. It's ideal for mounting in a table or operator station. A full-rack width mount version is available, and you can choose whether the control panel is attached to the right side or left side of the rack extension.

Yet another variation of this versatile panel provides two fully independent MLTP2 control panels mounted side-by-side in a 2RU, full-width rack mount, as shown at right. There is also a desktop version, with the basic half-width panel mounted in a decorative enclosure with finished wood end-caps, as shown below - right.

Regardless of the mount variation, each MLTP2 panel includes 26 programmable pushbuttons with Next and Previous keys for selection of source and destination data.

Easy to read LCD display provides backlit status of all functions within the panel. Pushbuttons are relegendable with LED backlighting in each for ease of reading in low light situations.

FEATURES

- 2RU
